

3A CERTIFIED T-21650

# TRIPLE ACTING VENT

DIMINISHES NEED  
FOR A SPILL DAM

**CERTIFIED®**  
Double Acting  
Olson Vent - T-21642

This double acting 3-A sanitary transport vent will safely moderate both pressure and vacuum to atmospheric conditions. It has been scientifically designed and thoroughly tested. It is far superior, in venting capabilities, to any other device available for 3-A transports.

**CERTIFIED®**  
Anti-surge  
Check Valve - T-20299

Created to increase product security, tainted spillage from surge is no longer a compromise to safe venting. Designed to work with the Olson Vent, it prevents leakage from surge while still letting the tank vent during normal operations, saving you costly cleanup.

## WARNING!

These are not intended to be a substitute for the necessary and safe practice of opening the manhole cover before loading or unloading.

**Call your local service center or dealer for more information.**
