

IF TIME IS MONEY, YOU'RE GOING TO NEED THE US-FIP® PUMP

US-FIP® Pump
20% more capacity
100% American

- The US-FIP® Pump model 22060 delivers more than 1350 Pounds/Minute (more than 160 gallons per minute). Competitor's similar pump model delivers a maximum of 130 gallons per minute.
- Substantial time savings and labor cost savings by using the US-FIP®.
- *Now equipped with maintenance free sealed bearings. No more packing the hub with grease!*
- Made completely in the United States!

US-FIP®

**“Our impellers are
proudly made in
America with quality
you can trust.”**

US-FIP® is a name that means manufactured in America to American standards. It is your neighbors and fellow taxpayers that manufacture our product to ensure its quality and durability. At US-FIP®, we don't buy foreign components nor do we outsource our manufacturing off shore. Our competition doesn't operate like us...and we're OK with that! Try our pump and try these spare parts...you'll never leave America again.

The US-FIP® sanitary impeller is made in accordance with FDA and 3A requirements. It is interchangeable on similar competitor's pump but US-FIP® impellers feature a 304 stainless steel impeller core and sanitary neoprene

**US-FIP® Sanitary Neoprene Impeller
US8984-0005**

**US-FIP® Sanitary Neoprene
Impeller
US8500-0005**

US-FIP® Impellers

- Interchangeable on competitor's pumps
- Stainless steel cores
- In accordance with FDA and 3A requirements
- Lower replacement costs
- Made in the US

US-FIP®
